Shelby Mustang details the entire story of these fantastic cars, from the early prototypes built in Shelby's Los Angeles shop to today's Ford-engineered high-tech performers. Written by one of the world's foremost authorities on Shelby automobiles, critically acclaimed author Colin Comer, and with a foreword by Lee Iacocca, the American automobile executive credited with the successful development of the Mustang, this is the definitive account of the Shelby. When Ford wanted to toughen up its super-successful new Mustang, they approached Carroll Shelby to give it the performance image it so sorely lacked. Beginning with a 1965 "K-Code" 289-cubic-inch-powered Mustang fastback, Shelby applied the same formula that had made his Cobra sports cars such devastating performers both on and off the track: more horsepower, less weight, balanced handling. The GT350 quickly established itself as a bonafide force in SCCA B-Production racing, twisting back roads, and boulevards alike—setting the course for future Shelby Mustangs, like the big-block GT500. Though those original Shelby Mustangs were

done by 1970, Ford dusted off its Shelby relationship in 2006 and has been producing high-performance Ford Mustang Shelybs ever since. This is a must-have read for any fan of American performance cars, whether you're a muscle-era original or a 21st-century stormer.

Lemon-Aid Used Cars and Trucks

2012-2013-Phil Edmonston 2012-05-19 Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. 19. Chapters: AC Cobra, Shelby Charger, Shelby CSX, Shelby Dakota, Shelby Daytona, Shelby GLHS, Shelby Lancer, Shelby Mustang, Shelby Series 1. Excerpt: The Shelby Mustang is a high performance variant of the Ford Mustang which was built by Shelby American from 1965 through 1970. Following the introduction of the fifth generation Ford Mustang, the Shelby nameplate was revived in 2007 for new high performance versions of the Mustang. The 1965-1966 cars were the smallest and lightest of the GT 350 models. These cars are often called "Cobras," which was the Ford-powered AC-based two-seat sports car also produced by Shelby American during the same period. Both models use the Cobra emblem, similar paint scheme, and the optional "Cobra" valve covers on many GT350s that were part of a marketing tie-in by Shelby, as well as one of his iconic symbols. All 1965-66 cars featured the K-Code 271 hp (202 kW; 275 PS) 289 cu in (4.7 L), modified to produce 306 hp (228 kW; 310 PS). Marketing literature referred to this engine as the "'Cobra hi-riser" due to its high-riser intake manifold. Beginning as a stock

Mustang with a 4-speed manual, the cars were shipped to Shelby American, where they received the high-riser manifolds, had their stock Ford Falcon live rear axles replaced with heavy-duty Ford Galaxie rear axles, and were given larger, metallic-lined rear drum brakes and Kelsey-Hayes front disc brakes. The 1965 G.T. 350 was not built for comfort or ease of driving. Less than 30 "G.T. 350R" race-spec cars that were built specifically for competition use under SCCA rules. The 1966 G.T. 350 had featured more comfort of casual drivers that included rear seats, optional colors, and an optional automatic transmission. This trend for additional features continued in following years, with the cars becoming progressively larger, heavier, and more...

speed, luxury, personal expression, and freedom. For many, the thrill of the drive has eclipsed the pure utility of the automobile. Each entry contains a colorful spec box noting the car's claim to fame, a Did You Know? factoid, the author's clever suggestions for "The Perfect Passenger" and the "Soundtrack" coming out of the speakers, Behind the Wheel notes, and a "Perfect Drive" for the marque or model covered.
